Thursday 25th March 2021

Dear Parents and Carers,

Heart Dissection, Wednesday 31st March 2021

In our science lessons during the Spring Term, we have been learning to identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood.

On Wednesday 31st March 2021, Year 6 have an exciting opportunity to dissect a sheep's heart. This will provide a meaningful and memorable context to support them in their learning about the circulatory system and the function of the human heart. Please click on the link below to complete the consent form.

<https://forms.gle/CjGJZwgGg4gZrDwf8>

If you do not want your child to participate in this lesson, please do let us know via the consent form and we will make alternative arrangements for a lesson teaching the same content but without the practical elements of the lesson.

We really hope this is a great success and a wonderful opportunity for children to develop their understanding of the heart, whilst also developing their scientific skills. A risk assessment has been taken to ensure this is a safe activity and we will take all necessary health and safety precautions.

Please complete the consent form by 9 am on Monday 29th March 2021.

Yours sincerely,

Miss Wells and Miss Botham
Year 6 Teachers
